

3 cubic meters of airflow per second

Firlane Systems ventilated polycarbonate roller shutter system originally developed for LHR T2, now used everywhere

Used by many high end retailers. The image on the left shows a recent installation at the brand new Heathrow Terminal 2. The shutter provides everything that retailers at Heathrow Terminal 2 require: visibility, good looks, security, UK manufactured and enough ventilation to cope with LHR powerful smoke extraction systems.

Designed to provide 3 cubic meters of airflow per second at dimensions of 3m x 3m. CNC machined slots available in multiple designs with no sharp edges.
